Title: Dermatology Consultation Report

Patient Name: [Patient Name]

Date: 2025-10-06

Summary:

Patient presented with persistent eczema on forearms. No signs of infection. Skin patch testing indicates mild allergic response to certain detergents.

Recommendations:

- Apply moisturizer twice daily
- Use mild, fragrance-free soap
- Avoid known allergens
- Follow up in 6 weeks

Medications Prescribed:

- Hydrocortisone 1% cream, apply to affected area twice daily

Doctor:

Dr. Jane Smith, MD
